Transportation Traffic Report:

An update on global situations that may affect product flow.

Week of: September 11, 2023

GLOBAL PULSE

Argentina and Chile

- The Southern Hemisphere is currently in winter season. As a result, the pass between Mendoza and Chile has been sporadically closed off and on due to inclement weather and the need for passageway repairs.
- Severe drought in the Panama Region continues to create a low water situation in the Panama Canal resulting in reduced vessel traffic and draft restrictions lessening the number of containers permitted on-board.

Greece

- Some areas are experiencing regional transportation disruption due to wildfires which may cause order delays.

North America

- There are currently no North American port disruptions that are impacting LCBO orders.
