Formal label reviews may be requested outside the NISS listing process if required, Quality Services will formally review labels against the current federal & provincial regulations provided they meet one of the following Quality Services criteria.

1. The product is an existing LCBO Item
2. The product is only intended for sale at the on-site premises of an Ontario brewery, and winery distillery
3. The item is for The Beer Store
(this process is not for items that are in NISS or have started the listing process)

It is highly recommended that a Supplier confirm the label is compliant prior to acquiring or printing cans/sleeves and introducing to retail/grocery channels.

Email karen.carter@lcbo.com these 3 things.

1. Allergen form – LCB 2360
2. Request for label review form – LCB 1642
3. Graphics/Artwork of the can or bottle customer will purchase

Please use the link to access the required forms: - www.doingbusinesswithlcbo.com

Please ensure the email request for a review is only for 1 particular item at a time, supplemental reviews for other items require their own email/request.

Please note:

Please inform Neal and I know if any consumer data needs updating and advise the date to revise. e.g. LCBO.com images, name revisions. If this re brand is launching on a specific date, please let us know.

1. This process is not for items currently within the NISS listings stages as a label review will be requested if the item is accepted to proceed.
2. NISS Label Reviews are part of the listing process after an item is accepted to proceed and requested via an additional information section of NISS.
3. The label to get reviewed is the actual label that will be distributed the LCBO channel.
4. Note - for an open 6 pack carrier of bottles, this is the bottle label, neck and body.
